Proposal for Undergraduate Research Committee Funding to attend the 2016 Conference of the Southern Political Science Association, San Juan Puerto Rico, January 7-9, 2016

<b>We are the following funds:</b>	<b>Total</b>	<b>Per person</b>
Flights (roundtrip IND-SJU)	\$1875.00	\$625.00 (estimated based on current price quotes)
Hotel (shared room for 2 nights)	\$482.60	\$160.87 (actual)
Conference registration	\$390.00	\$130.00 (actual)
Meals and incidentals	\$450.00	\$150.00 (estimated)
Ground transportation	\$150.00	\$50.00 (estimated)
<hr/>		
Subtotal	\$3197.60	\$1065.87
- PSC Department contribution	-\$300.00	-\$300.00 (Shane)
- Ground transportation costs covered by SPSA Artinian Award for Dr. □	-\$150.00	-\$50.00
<hr/>		
<b>TOTAL REQUEST:</b>	<b>\$2897.00</b>	<b>\$1065.87 (Reno)</b> <b>\$1065.87 (Andrew)</b> <b>\$765.87 (Shane)</b>

the opportunity to go before a panel of experts, and present/hone our findings so that we will hopefully be able to publish our paper and make a contribution to how future Senate candidates will mobilize voters using Twitter. This experience would not be possible without the help of the undergraduate research committee, and I hope that I have made clear the value I place on the chance to attend and represent Wabash College.

### **Reno Jamison, Personal Statement:**

The research project my colleague Andrew Powel and I are undertaking examines how Senate candidates in 2014 used twitter to mobilize the electorate. The use of social media in elections is a relatively new phenomena, beginning on a wide scale during the 2008 campaign. We are using a data set collected last year by students in PSC-111. When coding, if

the tweet is considered mobilization we determine if it is outreach, transformational, or

about the candidate typically through retweeting or talking to friends and family. A transformational tweet is one that asks the followers to participate in an action that may lead to more action or turn the follower into an organizer of the campaign. This is most commonly done through asking followers to volunteer in various capacities. The hope is that upon the completion of this project my colleague and I will be able to shed light on how elected officials turn to social media platforms and thereby inspire future research and scholarship on the topic.

Attending this conference would be a once in a lifetime experience for me as a young political science scholar. As a junior I am only a short year away from working on my senior seminar paper. Through working on this project and presenting this work to a panel of academics I will gain invaluable experience leading into senior seminar and comprehensive exams. Additionally, this experience presents the opportunity to have our work publish in a political-science journal, which would substantially increase my colleagues and my credibility as undergraduate political-science scholars. Having the experience of conducting this research, but especially presenting it at the SPSA conference will prove to be extremely beneficial whether we continue our education after Wabash or begin our professional careers. Professionally, this project will provide a unique proof of our proficiency in written and oral communication, as well as working collaboratively to accomplish a major project, which are qualities all employers seek in job candidates.

This project will be continually worked on over the course of the semester beginning with coding a data set of roughly eight thousand tweets and ending in an academic research paper. Andrew and I have coded on average one thousand tweets per week up to this point in the semester. The coding portion of this project is expected to be finished in the next two weeks. This will lead to the next portion of our project which is analysis of our data, compiling sources for a literary review, and working on the methodology section of our paper. Once the analysis of our data is complete we will begin drafting our paper and complete it by winter break. Early into winter break we will work on the conference presentation and hopefully conduct a practice presentation to faculty, staff, and

worth of work will culminate at the SPSA conference in Puerto Rico where we would present our research alongside other undergraduate students and established political-science scholars.

## **Xinyang (Shane) Xuan, Personal Statement:**

Over 2015 summer and fall, I have been conducting an independent research. My research project considers the exponentially increasing number of Chinese students studying abroad. Specifically, I consider the puzzle: Why do Chinese students study abroad? Although the potential explanations of emigration are well-documented in previous literature, very few empirical studies systematically explicate the exponentially increasing number of Chinese students studying abroad. Thus, my paper addresses this question by using and modifying Truex

□  
political ones such as grievance toward local government, are the dominating reasons that empirically explain the puzzle such that why so many Chinese students decide to study abroad.

In order to present the current progress of this research project, I decide to present my paper at the Southern Political Science Association 87th Annual Conference in Puerto Rico in January, 2016. Fortunately, my paper was accepted for presentation on the panel entitled "New Strategic Actors and Voices," under the category of "Comparative Politics: Developing Areas." The panel is scheduled at Jan 9 (Sat), 4:45 to 6:15pm. Drs. Paul Lenze (Northern Arizona University, panel chair), Gwyneth McClendon (Harvard University), Karisa Cloward (Southern Methodist University), and Young Kim (University of Evansville) are also in the panel. I am considering to go to graduate school after I graduate one year early with double majors in Political Science and Mathematics from Wabash, the experiences of presenting my independent research at a professional conference with the world renowned political scientists would give me tremendous help.

Also, the conference would be an extremely important opportunity to network before graduate schools make their admissions decisions. My study abroad paper (accepted by SPSA), along with my series of Chinese media papers (presented at MAR/AAS, and to be presented at ISA-Midwest), and social media paper (submitted to MPSA), aims to solve a bigger puzzle that I am attempting to investigate during my Ph.D. study -- Why is China's authoritarian regime stable compared to other dictatorships in the world? Thus, being able to receive feedbacks on my current project will not only help my graduate school application, but also help me grow as a potential political scientist.
